Date	29 September 2026
Team ID	SWTID-2026-5113
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Solution Architecture Diagram:

LegalEase uses Streamlit for the presentation layer, FastAPI for API handling, Gemini 1.5 Pro through the Google Generative AI SDK for AI generation, and document-formatting utilities for TXT, DOCX and PDF output.

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Collects document type, parties, terms and dates; displays editable previews and download options.	Streamlit
API / Backend Layer	Receives requests, validates inputs and exposes the /generate endpoint for document generation.	FastAPI; Pydantic
AI Core	Builds the generation prompt and obtains structured legal document content from the selected model.	Gemini 1.5 Pro; Google Generative AI SDK
Data / Storage	No database is specified. Generated documents are formatted and exported in supported file formats; API key is kept in .env.	python-docx; FPDF; .env

Note: No separate database, authentication service, or load balancer is specified in the LegalEase project documentation.
