LegalEase: AI-Powered Legal Document Generator **Maximum Marks:** 5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Product backlog and sprint schedule prepared from the LegalEase project milestones and activities.

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task Story	Points	Priority	Team Members	Sprint Start Date	Sprint End Date (Planned)
Sprint-1	Model Selection & Architecture	USN-1	As a project team, we can understand LegalEase requirements for generating structured legal documents from document type, parties, terms and dates.	2	High	TBD	TBD	TBD
Sprint-1	Model Selection & Architecture	USN-2	As a project team, we can research and select a suitable generative AI model for legal document generation.	2	High	TBD	TBD	TBD
Sprint-1	Model Selection & Architecture	USN-3	As a developer, I can define the Streamlit frontend, FastAPI backend, Gemini AI core and document-formatting architecture.	3	High	TBD	TBD	TBD
Sprint-1	Environment Setup	USN-4	As a developer, I can create the Python environment and install the required FastAPI, Streamlit, Gemini and document-generation libraries.	2	High	TBD	TBD	TBD
Sprint-2	Core Functionalities	USN-5	As a user, I can generate legal documents such as contracts, agreements and NDAs using document type, parties, terms and dates.	3	High	TBD	TBD	TBD
Sprint-2	Core Functionalities	USN-6	As a user, I can receive the generated document in structured legal formatting.	2	High	TBD	TBD	TBD
Sprint-2	Core Functionalities	USN-7	As a user, I can export the generated document as TXT, DOCX and PDF.	3	High	TBD	TBD	TBD
Sprint-2	Core Functionalities	USN-8	As a user, I can edit the generated legal document before downloading it.	2	Medium	TBD	TBD	TBD
Sprint-3	API Logic Integration	USN-9	As a developer, I can initialize the FastAPI application and provide a root endpoint for service verification.	2	High	TBD	TBD	TBD
Sprint-3	API Logic Integration	USN-10	As a developer, I can define the Pydantic DocumentRequest model to validate incoming document data.	2	High	TBD	TBD	TBD
Sprint-3	API Logic Integration	USN-11	As a developer, I can create the POST /generate endpoint and connect it to GeminiDocumentGenerator.	3	High	TBD	TBD	TBD
Sprint-4	Frontend Development	USN-12	As a user, I can enter document type, parties, terms and effective date through a Streamlit interface.	3	High	TBD	TBD	TBD
Sprint-4	Frontend Development	USN-13	As a user, I can preview the AI-generated legal document in a styled interface.	2	Medium	TBD	TBD	TBD
Sprint-4	Frontend Development	USN-14	As a user, I can edit the generated document and download it in TXT, DOCX or PDF format.	3	High	TBD	TBD	TBD
Sprint-5	Deployment & Testing	USN-15	As a developer, I can prepare the application for local deployment with dependencies and environment variables.	2	High	TBD	TBD	TBD
Sprint-5	Deployment & Testing	USN-16	As a tester, I can verify document generation, preview, editing and downloads using different input combinations.	3	High	TBD	TBD	TBD
Sprint-5	Deployment & Testing	USN-17	As a team, we can verify correct logo, footer, formatting and terms in generated documents.	2	Medium	TBD	TBD	TBD

Source mapping: Sprint-1 corresponds to Milestone 1 (model selection, architecture and environment setup); Sprint-2 to Milestone 2 (core functionalities); Sprint-3 to Milestone 3 (API logic); Sprint-4 to Milestone 4 (frontend); Sprint-5 to Milestone 5 (deployment and testing).
