Coding & Solution

Date	15 March 2026
Team ID	SWTID-2026-5113
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	Not provided
Programming Language(s)	Python
Framework(s) Used	FastAPI; Streamlit
Key Features Implemented	AI legal document generation; editable preview; TXT/DOCX/PDF export; branding with logo/fonts; terms table; FastAPI API.
Pending / Incomplete Features	No specific incomplete features stated. Future enhancements: deeper contract analysis, legal database integration, personalized recommendations.
Setup / Run Instructions	Python 3.10+; create virtual environment; install dependencies; configure Gemini API key in .env; launch FastAPI with Uvicorn and Streamlit app.py.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	No
4	Error handling is implemented for critical operations	No
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	No

Additional Notes / Comments:

Based on the LegalEase project document: the solution uses modular FastAPI routes, named generator/formatting functions, Streamlit UI, Gemini integration, and document export utilities. The project documents testing of the end-to-end workflow. A repository link and explicit source-code error-handling/version-control details were not provided in the project document.
