Scalability & Future Plan

Date	29.09.2026
Team ID	S WTID-2026-5113
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Current deployment is local using FastAPI and Streamlit.	Limits access and horizontal scaling until cloud deployment.	High
2	eneration depends on the Gemini API and configured API key.	External API availability and limits can affect generation.	M edium
3	Advanced analysis, legal-database integration and personalizedrecommendations are future enhancements.	Current version has a narrower feature set than the planned	M edium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Local FastAPI + Streamlit deployment.	Deploy on cloud with scalable instances and load balancing.
2	Data Storage	Exports to TXT, DOCX and PDF; Persistent storage is not specified.	Add scalable database/object storage for metadata and files.
3	Performance	Gemini generation via FastAPI; S treamlit displays output.	Use async handling, caching and optimized API calls.
4	Security	k ey stored in .env. Sensitive data handled securely; API	Use managed secrets, authentication, encryption and production controls.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact

Phase 2	Cloud deployment and scalable backend; add persistent storage.	3–6 months	Support larger user base and reliable document handling.
Phase 3	Deeper contract analysis, legal database integration and multilingual capabilities.	6–12 months	Expand legal-document understanding and reach.
Phase 4	Personalized recommendations, advanced automation and broader SaaS capabilities.	12+ months	Improve usability, personalization and long-term scalability.
